ROCKLIFFE ANNOUNCES THE IMMEDIATE AVAILABILITY OF SIEVE FILTERING FOR MAILSITE

MailSite can now filter Spam and viruses before they enter into the messaging system

San Jose, Ca, October 10, 2000 --- Rockliffe, Inc., a leading developer of scalable messaging infrastructure software for Windows NT/2000, today announced the immediate availability of Sieve Filtering for MailSite, a powerful and comprehensive Spam and virus filtering tool.

This new version of MailSite uses a standard Internet filtering language called Sieve. Sieve allows customers to create powerful filters that will block messages containing Spam and viruses before they enter the system. This reduces the load on the messaging server and eliminates the need for third party filtering and virus scanning software. The MailSite Sieve Filter is bundled with MailSite 4.5 at no extra cost.

"We believe that we are one of the first companies to deliver this new Sieve capability in a shipping product. We have built our Sieve Filter to integrate seamlessly into MailSite," said Rockliffe president John Davies.

"The MailSite suite of products give Rockliffe a front line advantage in this arena," said Nina Burns, founder of Creative Networks, Inc. and Executive Vice President of Sytel.

The immediate availability of the MailSite Sieve Filter adds to Rockliffe's reputation as the leading provider of Windows-based Internet messaging platforms. The MailSite Sieve Filter allows e-mail providers hosting with Rockliffe MailSite to offer the highest value services to their clients and users.

From the company's inception, Rockliffe has been committed to leading the market in Internet messaging infrastructure software designed specifically for Windows NT/2000. Rockliffe's flagship product, MailSite, is designed to be easy to administer and can quickly accommodate additional users with minimal investment in hardware, software, personnel and premises. Rockliffe MailSite's unique scalability provides an affordable long-term e-mail solution for companies and organizations of all shapes and sizes, from the smallest partnership to the largest service provider. MailSite Express web e-mail is now available in eleven additional languages, including Chinese, French, Spanish and Indonesian.

The MailSite Sieve Filter is bundled at no additional cost with Rockliffe MailSite 4.5. Rockliffe MailSite prices begin at \$995 for up to 500 users.
