

MailSite® Collaborator SP 8

MailSite Collaborator SP is a low cost alternative to Microsoft Hosted Exchange 2007 that has been engineered from the ground up for service providers

A PLATFORM BUILT FOR SERVICE PROVIDERS

MailSite Collaborator SP is a low cost alternative to Microsoft Hosted Exchange 2007 that has been engineered from the ground up for service providers. MailSite Collaborator SP provides simple yet powerful clustering options allowing you to build a reliable, scalable and fault tolerant email and calendar hosting platform on 32 bit hardware. An n+1 cluster can be provisioned directly from a central Microsoft SQL Server database, enabling full billing and provisioning system integration.

VALUE ADD SERVICES

MailSite Collaborator SP is a secure SMTP, POP, IMAP and Calendar server that includes a multi-language customizable AJAX web client. Anti-spam, anti-virus and calendar services can be can be provisioned on a per user basis, allowing you to offer revenue-generating value-added services.

ONE FLEXIBLE, LOW MAINTENANCE PLATFORM FOR LIFE

The modular and distributed architecture of MailSite Collaborator SP allows it to scale across multiple clustered application servers. Additional servers can be added at any time to meet increased capacity requirements. MailSite Collaborator SP supports rolling upgrades allowing maximum uptime.

DIFFERENTIATE YOUR SERVICES

MailSite Collaborator provides a powerful shared calendar server allowing subscribers to share their calendars with family, friends and colleagues inside and outside their company. MailSite Collaborator supports many of the popular clients such as Outlook, Apple's iCal and Google Calendar. The anti-spam and anti-virus engines offer your customers with cutting edge email protection.

Integrated anti-spam & virus		
Easy to install & operate		

SERVICE PROVIDER BENEFITS

- Lower operational costs through automated provisioning & billing
- Bundled , high quality solution reduces costs & differentiates services from competitors
- Low cost, low risk rolling upgrades
- Out-of-the-box anti-spam, anti-virus and calendar server
- Powerful content filtering
- Mature technology proven since 1995
- Round-the-clock technical support

MailSite® Collaborator SP 8

FEATURE SUMMARY

- ❑ Seamless integration with SQL provisioning & billing systems
- ❑ Fault-tolerant, load-balanced architecture
- ❑ All-in-one high quality email & calendar server
- ❑ Low overhead, low risk rolling upgrades
- ❑ Out-of-the-box email security
- ❑ Support for Outlook & major clients
- ❑ Pre-integrated top quality virus scanner
- ❑ Pre-integrated top quality spam filter
- ❑ Built-in webmail, wireless email & list server
- ❑ Supports multiple, virtual domains
- ❑ 24 x 7 technical support

REQUIREMENTS

Hardware

- ❑ Microsoft® Windows™ compatible hardware
- ❑ 512MB RAM minimum
- ❑ 100MB storage minimum

Software

- ❑ Windows 2000 Server (SP4+), or;
- ❑ Windows 2000 Advanced Server (SP4+), or;
- ❑ Windows Server 2003 Standard Edition, or;
- ❑ Windows Server 2003 Enterprise Edition
- ❑ Microsoft SQL Server 2000 (SP3+)
- ❑ Microsoft SQL Server 2005
- ❑ Internet Information Services (IIS) with Microsoft .NET Framework 2.0

ADMINISTRATION

- ❑ Local windows console
- ❑ Remote windows console
- ❑ Remote web console
- ❑ Multi-level logging
- ❑ Performance monitoring
- ❑ Log to windows event log
- ❑ Log to text file, ODBC database

LICENSING

MailSite Collaborator SP is available in two license models: SP-s is for a single node and SP-c is for multi-node deployment. Call or email sales@mailsite.com for more information.

DETAILED FEATURE LIST

New Features

- Shared Calendar
- AJAX Web Client
- Greylisting
- MIME-aware filters

Email Clients

- Microsoft Outlook
- Microsoft Outlook Express
- Mozilla Thunderbird
- Qualcomm Eudora
- Apple Mac Mail
- Windows Vista Mail

Calendar Clients

- Microsoft Outlook 2007
- Windows Vista Calendar
- Apple iCal
- Google Calendar
- Mozilla Sunbird

Web Client (MailSite Express)

- 19 languages (double-byte)
- Easy to brand & customize
- Email, calendar and contacts
- AJAX architecture

Cell Phone Integration

- Wireless push email
- SMS alerts

Content & Attachment Filtering

- Inbound & outbound
- Filter by size, attachment type & MIME content
- Reject, Delete, Quarantine, Tag, Log, Archive...
- Include/Exclude by Server, Domain, Mailbox
- Enable at: Server, Domain, Mailbox levels

Corporate Policy Enforcement

- Banner support
- Brand outbound emails
- Specify unacceptable content
- Monitor & log specific content
- Include/Exclude by Domain, Mailbox

Sender Authentication

- Require reverse DNS
- Real Time Black List
- Validate From: domain

- Heuristic analysis, Pattern matching, Spam definitions
- Greylisting
- Automated updates to block new types of spam
- Automated spam engine updates
- White lists & Black lists
- Enable at: Server, Domain & Mailbox levels

Message Store

- Based on NTFS
- Compatible with Microsoft Windows 2000 or 2003 file server

Directories

- Support for LDAP3

Migration Tool

- Built in XML tool migrates users from any other mail server

List Server

- Unlimited membership
- Moderation via email & web
- Support for DIGEST
- Configurable messages
- Text or ODBC membership
- Web archive

Virtual Domains

- Send & receive for multiple domains
- Associate domains with IP addresses
- Domain level administration

Architecture & Programmability

- 32-bit Windows code
- Multi-processor, multi-threaded
- COM & C++ APIs
- Sieve content filter scripts
- Server & mailbox Agents
- Mail List Agents

Standards (RFCs)

- SMTP: 821, 822, 1123, 1651, 1652, 1653, 1891, 1892, 1893, 1894, 1985, 2034
- POP3: 1725, 2095
- IMAP4: 2060, 2086, 2095, 2359
- LDAP3: 1558, 1779, 1778, 1798, 1823
- HTTP/HTML: 1867, 1942, 1980, 2557, 2616, 2659
- Calendar: 2445
